
Math (MATH)

MATH 001A Introduction to Calculus (5)

Class Hours: 90 Lecture

Prerequisite(s): MATH 015 or MATH 016

Transfers to: UC/CSU

C-ID: MATH 210

Introduction to Calculus

MATH 001A is an introduction to differential calculus of elementary functions (including trigonometric, exponential, and logarithmic). The course covers limits, continuity, derivatives, basic integrals, the Fundamental Theorem, and applications.

MATH 001B Calculus With Applications (5)

Class Hours: 90 Lecture

Prerequisite(S): MATH 001A

Transfers to: UC/CSU

C-ID: MATH 220

Calculus With Applications

MATH 001B is an introduction to integral calculus. The course covers techniques of integration, applications of integration, improper integrals, polar coordinates, and infinite series.

MATH 002A Multivariate Calculus (4)

Class Hours: 72 Lecture

Prerequisite(s): MATH 001B

Transfers to: UC/CSU

C-ID: MATH 230

Multivariate Calculus

MATH 002A is the study of three-dimensional vectors, calculus of functions of more than one variable, lines and planes, vector-valued functions, partial derivatives, multiple integrations, the calculus of vector fields, Green's Theorem, Stokes' Theorem, and the Divergence Theorem.

MATH 002B Differential Equations (4)

Class Hours: 72 Lecture

Prerequisite(s): MATH 002A

Transfers to: UC/CSU

C-ID: MATH 240

Differential Equations

MATH 002B is the study of first-order linear differential equations and their applications in science and engineering, linear differential equations of higher order, applications of second-order differential equations to vibrational models, differential equations with variable coefficients, Laplace transformations and systems of linear differential equations. (Please note: This course is offered infrequently.)

MATH 010A Structure & Concepts in Math I (3)

Class Hours: 54 Lecture

Prerequisite(s): MATH 063 or MATH 064

Transfers to: UC/CSU

C-ID: MATH 120

Structure & Concepts in Mathematics I

MATH 010A is designed for prospective elementary school teachers. The course covers the development of real numbers including integers, rational and irrational numbers, computation, prime numbers and factorizations, and problem-solving strategies.

MATH 010B Structure & Concepts in Math. (3)

Class Hours: 54 Lecture

Prerequisite(s): MATH 010A

Transfers to: UC/CSU

Structure & Concepts in Mathematics II

MATH 010B is designed for prospective elementary school teachers. The course covers counting methods, elementary probability, and statistics. Topics from geometry include polygons, congruence and similarity, measurement, geometric transformations, coordinate geometry, and selected applications. This class does not satisfy the G. E. quantitative reasoning requirement for non Liberal Studies majors at four-year institutions.

MATH 016 Precalculus and Trigonometry (6)

Class Hours: 108 Lecture

Prerequisite(s): MATH 063 or MATH 064

Transfers to: UC/CSU

C-ID: MATH 955

Precalculus and Trigonometry

MATH 016 is designed to prepare students for calculus, and includes the study of polynomial, absolute value, radical, rational, exponential, and logarithmic functions, analytic geometry, and polar coordinates. The study of trigonometric functions, their inverses and their graphs, identities and proofs related to trigonometric expressions, trigonometric equations, solving right triangles, solving triangles using the Law of Cosines and the Law of Sines, and introduction to vectors.

MATH 017 Foundations of Advanced Mathem (4)

Class Hours: 72 Lecture

Prerequisite(s): Placement as determined by the college's multiple measures assessment process or completion of a course taught at or above the level of intermediate algebra.

Transfers to: UC/CSU

Foundations of Advanced Mathematics

MATH 017 is a great course to review all the different functions before starting your Calculus class. It covers all these functions: linear, polynomial, absolute value, radical, rational, exponential, logarithmic functions, and trigonometric functions. We will be concentrating more on the graphing of the above functions but also going in-depth with the logarithmic and trigonometric functions. We will also cover polar coordinates and graphs as well as arithmetic and geometric sequences

MATH 039 Quantitative Analysis (3)

Class Hours: 54 Lecture

Prerequisite(s): MATH 063 or MATH 064

Transfers to: UC/CSU

C-ID: MATH 130

Quantitative Analysis

MATH 039 is the study of mathematical topics as they relate to finance, systems of equations, linear programming, set theory, combinatorial techniques, and probability. This course also focuses on applications in business, economics, and social sciences.

MATH 045 Contemporary Math (3)

Class Hours: 54 Lecture

Prerequisite(s): MATH 063 or MATH 064

Transfers to: UC/CSU

Contemporary Math

MATH 045 is a college level liberal arts mathematics course surveying a collection of topics including Management Science, Social Choice, Statistics and Growth and Symmetry. (Satisfies CSU Fresno Gen. Ed. CORE, Quantitative Reasoning).

MATH 049 Mathematics Directed Study**(1 - 2)***Class Hours: 108 Laboratory**Transfers to: CSU*

Mathematics Directed Study

MATH 049/099 are designed for student who wish to undertake special projects related to mathematics. Students, under instructor guidance and acknowledgement, may pursue individual exploration after completing or while currently enrolled in at least one course in the department of directed study.

MATH 061 Elementary Algebra**(5)***Class Hours: 90 Lecture**P/NP**Prerequisite(s): MATH 101 or MATH 100*

Elementary Algebra

MATH 061 is the first course in a two semester sequential elementary and intermediate algebra program. Topics for elementary algebra include arithmetic review, solving linear equations and inequalities in one variable, graphing linear equations and inequalities in two variables, solving linear systems, operations with polynomials, solving equations by factoring, operations with rational expressions, and addition of radical expressions.

MATH 063 Intermediate Algebra**(5)***Class Hours: 90 Lecture**Prerequisite(s): MATH 061*

Intermediate Algebra

MATH 063 is the second course in a two semester sequential elementary and intermediate algebra sequence. Topics for intermediate algebra include factoring, solving quadratic, rational and radical equations, inequalities, integer and rational exponents, graphing conics, functions, scientific notation, and applications.

MATH 064 Elementary & Intermediate Alg**(5)***Class Hours: 90 Lecture**Prerequisite(s): MATH 100*

Elementary and Intermediate Algebra

MATH 064 covers Elementary and Intermediate Algebra in one semester, eliminating the repetitiveness of the traditional two-semester sequence. This course is designed for students who either have had some previous exposure to elementary algebra or have a facility for learning math. This course satisfies the intermediate algebra requirement for any transfer-level math course.
