
Diesel Technology (DT)

DT 050 State Laws and Fed Regulations (3)

Class Hours: 54 Lecture

State Laws and Federal Regulations

DT 050 provides students with an introduction to the trucking industry, rules, and regulations to prepare students for the written test to obtain a CLP (Commercial Learners Permit) from the state of California. Students will also complete the FMCSA (Federal Motor Carrier Safety Administration) requirements for the theory portion of the ELDT (Entry Level Drivers Training). Individuals must be at least 18 years of age and have a valid driver's license in order to hold a CLP.

DT 052 Safe Operation Fundamentals (3)

Class Hours: 54 Lecture

P/NP

Safe Operation Fundamentals

DT 052 will prepare you with the skills and knowledge for a career in the Truck Driving industry. Faculty will provide a supportive and inclusive learning environment covering vehicle inspection and control portions for the Commercial Drivers License (CDL) in the state of California. Students will leave the class well-prepared for both federal and state commercial driving requirements.

DT 053 Cargo Handling and Securement (1)

Class Hours: 27 Lecture | 9 Laboratory

Cargo Handling and Securement

DT 053 provides practical and theoretical training in the operation of material handling equipment (forklift and pallet jack), and the loading and securement of cargo on various types of commercial vehicles. Students receive training in loading commercial vehicles to comply with both axle weight and securement laws. In addition, students also develop their skills in minor maintenance for an inspection of load securement devices.

DT 058 Operations of Commercial Vehic (3)

Class Hours: 18 Lecture | 108 Laboratory

Operations of Commercial Vehicles I

DT 058 provides practical and theoretical knowledge in the operation of two- and three-axle tractor-trailer combinations on a driving range and highway. Students will drive commercial vehicles equipped with automatic transmissions and be introduced to shifting a dual-range transmission. Additionally, students will be oriented in California state laws pertaining to a commercial motor vehicle, which prepares them for the CDL Skills and Knowledge Test for the Class A license. Students will also complete the FMCSA (Federal Motor Carrier Safety Administration) requirements for the behind-the-wheel public road portion of the ELDT (Entry Level Drivers Training).

DT 059 Operations of Commercial Vehi (3)

Class Hours: 108 Lecture | 18 Laboratory

Prerequisite(s): DT 058

Operations of Commercial Vehicles II

DT 059 provides practical and theoretical knowledge in the operation of two- and three-axle tractor-trailer combinations on a driving range and highway with lengths over 65 feet, including single and double trailers. Students will develop hand, eye, and foot coordination for shifting various types of dual-range transmissions on the driving range and in real-life city and highway traffic.

DT 074 Hazardous Materials Transporta (1)

Class Hours: 18 Lecture

Hazardous Materials Transportation

DT 074 provides theoretical training for the transportation of hazardous materials and satisfies the Federal Motor Carriers Entry Level Drivers Training requirement.

DT 079 Commercial Driver Testing (0.5)

Class Hours: 27 Laboratory

Co-Requisite(s): DT 050, DT 052, and DT 058

Commercial Driver Testing

DT 079 offers students the opportunity to test for a commercial drivers license with the California DMV (Department of Motor Vehicles). Students will utilize classroom and laboratory experiences to license as a commercial driver.

DT 094 Introduction to Diesel Engine (3)

Class Hours: 36 Lecture | 54 Laboratory

P/NP

Introduction to Diesel Engine Repair

DT 094 provides students with the opportunity to explore the operation and repair of modern diesel engines. Students will learn principles and theories by running, testing, diagnosing, disassembling and reassembling modern engines.

DT 095 Advanced Diesel Engine Repair (3)

Class Hours: 36 Lecture | 54 Laboratory

P/NP

Prerequisite(s): DT 094

Advanced Diesel Engine Repair

DT 095 provides students with the opportunity to explore the operation and repair of modern computer-controlled diesel engines. Students will gain hands on experience in the principles and theories by testing and diagnosing computer-controlled diesel engines.

DT 096 Hydraulics (3)

Class Hours: 36 Lecture | 54 Laboratory

P/NP

Hydraulics

DT 096 provides students with an introduction to agriculture and industrial heavy equipment hydraulic systems. Students will gain hands on experience in the principles and theories by testing, diagnosing, and repairing heavy equipment hydraulic components and systems.

DT 097 Equipment Systems (3)

Class Hours: 36 Lecture | 54 Laboratory

P/NP

Equipment Systems

DT 097 provides students with an introduction to the operation and repair of agriculture and industrial heavy equipment systems including. Students will gain hands on experience in the principles and theories by testing, diagnosing, disassembling, repairing and reassembling heavy equipment components and systems.
